

Launch of Novtor, Rosuvastatin | 13th of June 2023

We are pleased to announce that Novugen has launched **NOVTOR, Rosuvastatin** on 13th of June 2023.

NOVTOR is used for the treatment of cardiovascular diseases, specifically atherosclerosis (narrowing of the arteries) caused by high LDL-Cholesterol (bad cholesterol). When healthy diet and exercises are no longer the options, NOVTOR will help by reducing Total Cholesterol, LDL-Cholesterol (bad cholesterol), and increase HDL-Cholesterol (good cholesterol).

Compared to other statins like simvastatin and atorvastatin, **NOVTOR** has better LDL-Cholesterol lowering efficacy and has less side effects of muscle pain and liver effects at higher doses.

At Novugen, we continuously seek to diversify our pipeline to serve the highest standard innovative products for patients globally.
