

**Oncogen Pharma Pakistan, an affiliated company of Novugen, was successfully launched** - becoming Pakistan's first vertically integrated manufacturing facility dedicated to produce oncology generics for developing markets, especially for nations that lacks necessary infrastructure to manufacture oncology drugs.

Leveraging on Novugen's USFDA approved facilities in Malaysia, we partner with Oncogen Pharma Pakistan with technology transfer pact to develop hard-to-source and technology intensive products. This enables the production of high quality, affordable oncology drugs to be brought to the market at an earlier stage, ensuring timely access for patients in the targeted regions.

The resounding success of their establishment in Pakistan signifies Oncogen Pharma's commitment to address the global demand and making an impact to the nation's economy. Novugen is enthusiastic to be part of this milestone to improve the health and quality of life millions of cancer patients worldwide.
